

**Julien Mellon**

Software Engineer

## SUMMARY

Software engineer with a deep interest in AI. Proven track record of creating and implementing successful front and back end web applications. Looking to bring my skills to a tech company with global reach.

## WORK EXPERIENCE

### Software Engineer at 100devs, Los Angeles, CA

January 2021 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full stack web applications
- Applied agile methodologies like SCRUM for project management

#### Recent Projects:

**Drenched (Fullstack Web App)** – User can enter a list of their plants and keep a diary of each plant's progress and watering schedule. User can upload progress photos of their plants and track growth progress. User can get recommendations for plants that might enjoy similar conditions. can take coffee orders from customers with their names. Baristas can login to the app and see orders that have been made, mark them as complete. Orders that have been completed will note which barista completed the order.

**Bright Lights Inventory Manager** - Users login to their account and can edit and update an inventory database through the inventory manager application built to specifically manage Lighting Units and their components, along with their maintenance schedules. Users can add new inventory entries, update and edit their storage/usage locations, manage equipment rented to other theaters, and remove items from the inventory.

**Other Projects:** *Too Hungry For Pizza*, Pizza topping Randomizer API, *Window into the Universe* web app with NASA API integration, *Three Things Today*, a Fullstack Web app, and many more
